RINSING THE BEVERAGE LINES

Materials Needed:

- Provided cleaning canister
- Small empty pitcher/container (3 liters minimum)

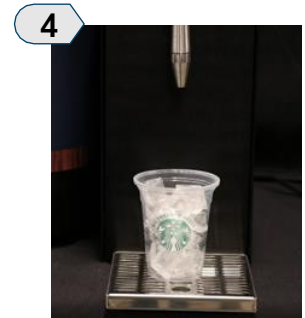

1
Disconnect the intake hose from the server by pressing the metal button on the server adapter

2
Turn ON the system pressure using the switch on the back of the unit

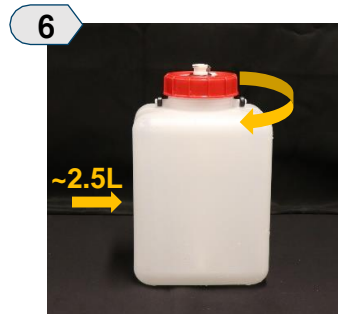

3
Turn the beverage selection knob on the front of the unit to COLD BREW

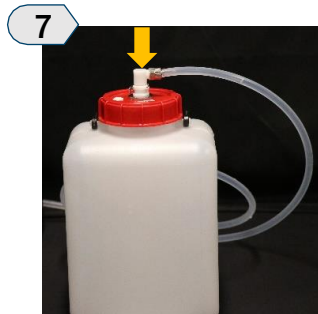

4
Purge the system of any remaining coffee by dispensing into a 16oz cup until flow stops

5
Coffee purged from the unit can be reserved and used later ***if it meets shelf-life requirements***

6
Fill cleaning canister halfway (approx. 2.5L) with clean, lukewarm water; attach lid and tighten

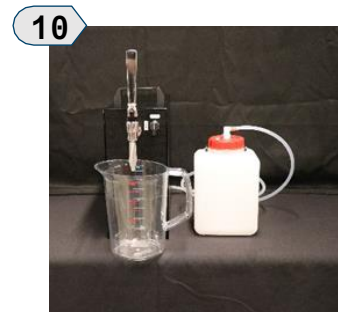

7
Attach the dispense end of the intake hose to the cleaning container. Push until the connectors “click” in place

8
Turn ON the system pressure using the switch on the back of the unit

9
Turn the beverage selection knob on the front of the unit to COLD BREW

10
Place an empty container (min. 3L) under the faucet

11
Open faucet and dispense all water in the container. Close faucet.

12
Disconnect the intake hose from the cleaning canister. Rinse the canister and store.
